Project Setup & Style Guide

Alexander Thalhammer | @LX_T

Project Setup & Style Guide

- Angular project setup
  - Prettier
  - ESlint
- Use Angular coding style guide
  - Draft of new Angular coding style guide
  - Copy and adjust my coding style guide
  - The original Angular coding style guide

Agenda

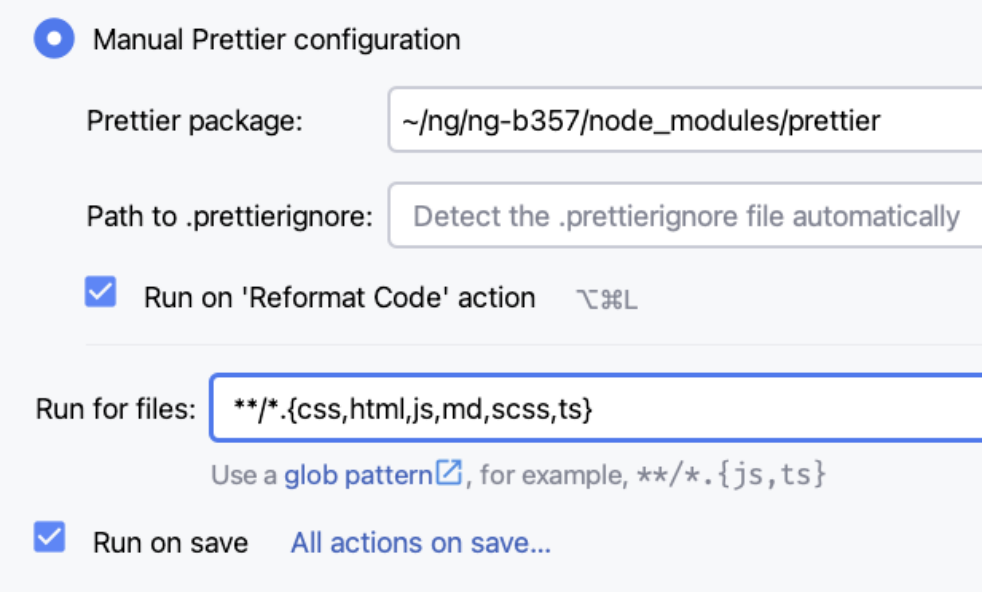
Angular project setup

- update to latest @angular/cli and then ng new [name]
  - for bigger projects use create-nx-workspace [name]
- setup prettier
- setup eslint
- ready to code

Prettier config

```
pnpm i -D prettier
```

```
{
  "printWidth": 120, // or 140
  "singleQuote": true
}
```



```
{
  "editor.defaultFormatter": "esbenp.prettier-vscode",
  "editor.formatOnPaste": true,
  "editor.formatOnSave": true,
  "prettier.documentSelectors": ["**/*.{css,html,js,md,scss,ts}"]
}
```

ESlint config

- You can use eslint v8 (deprecated) config still ☺
- For new projects follow this guide from angular-eslint

```
ng add @angular-eslint/schematics
```

- Or else just copy & adjust the config of my workspace
- It will automatically integrate into ng(nx) lint and IDE ☺

Draft of new Angular coding style guide

- draft written by Tech Lead Jeremy Elbourn (Google)
  - https://gist.github.com/jelbourn/0158b02cfb426e69c172db4ec92e3c0c
- read the blog post by my lesser self
  - https://www.angulararchitects.io/blog/draft-of-the-revised-angular-style-guide/
- some things have changed / are going to change
- everything else should be considered already today!

Angular coding style guide by LXT

- current version can be found in workshop workspace
  - https://github.com/L-X-T/ng-b357/blob/main/style-guide/style-guide.md
- it's organized by filetype
  - HTML View Templates
  - NPM Packages
  - SCSS styling files
  - TypesScript (Angular) files
- feel free to copy, paste and adjust ☺
  - if you have feedback, please contact me!

Original Angular coding style guide

- still valid recommendations (only minor things changed)
  - https://angular.dev/style-guide
- most things have been removed because they are not "Angular-specific" enough
- should still be read and considered!
  - e.g., consider limiting files to 400 lines of code

Project Setup & Style Guide

- Angular project setup
  - Must do: Prettier
  - Must do: ESlint
- Use Angular coding style guide
  - Must do: Draft of new Angular coding style guide
  - Should do: Copy and adjust my coding style guide
  - Consider: The original Angular coding style guide
