

ANGULAR
ARCHITECTS

Conclusions

Alexander Thalhammer | @LX_T

Conclusions (I)

Update Angular &
measure with
Perf Audit Tools

Replace
Moment.js and
lodash with
treeshakable libs

15: Migrate to
Standalone
Components

Use performance
best bractices like
http/3 &
gzip/brotli

14: Use
NgOptimizedImage
to support image
lazy loading

16: Migrate to new
builder (esbuild +
vite)

Conclusions (II)

17: Migrate to new
control flow,
use @for track

Use ngZone.
runOutsideAngular
or go zoneless

Play with @rx/angular
Virtual Scrolling

Use ChangeDetection
Strategy.OnPush

Use async pipe or else
takeUntilDestroyed
whenever you
.subscribe()

Try out
signals!
